

i enjoy listening to satellite radio.let the nab mind their own bussiness!! i pay for the right to listen to sat. radio in my home and car and am entitled to have instant traffic and weather info just like everyone else! the nab is just scared that they finally have a little competition now. i actually pay money so i dont have to listen to the same old stuff over and over again on the radio. who is the nab to tell me that i cant have instant traffic and weather. i strongly urge you to oppose nabs petition 04-160. we finally have good radio with variety that im willing to pay money for, LEAVE IT ALONE!!!!. start worrying about real issues
